

Adam Keogh

Transition Year Engineering Placement CV
Longwood, Co. Meath

www.adamkeogh.com | 087 265 1064

Profile

Transition Year student with a strong interest in engineering, Formula 1 and practical problem solving. I enjoy hands-on projects, learning how things work and exploring the engineering behind Formula 1 through school CBAs and personal builds.

Key Skills & Interests

- Engineering curiosity and practical problem solving
- Hands-on project building and model making
- Formula 1 engineering and design interest
- Research, data analysis and presentation skills
- Video editing and digital presentation creation
- Teamwork through football and school projects

Featured Projects

Motorised F1 Car Build	Built using an orange juice carton, Lego wheels, skewers, an electric motor and an elastic band.
Science CBA	Created homemade airflow experiments and wind tunnel testing inspired by Formula 1 aerodynamics.
Maths CBA	Analysed Formula 1 lap times and fuel load effects using calculations and race data.
Motorised Fairground Ride	Designed and built a working engineering model demonstrating movement and mechanical design.

Visit my website www.adamkeogh.com for more information on these and more projects

Activities

- Football player with Longwood AFC
- Regular gym training and fitness
- Gaming and Formula 1 simulator racing

Placement Goal

I am looking for a Transition Year placement where I can learn more about engineering, technology, design or manufacturing in a real working environment. I would like the opportunity to learn from experienced people, understand how projects are developed and improve my practical and problem solving skills.
